KBMD MICRODRIP®

Patent Pending

For use in food service facility drain lines, professionally serviced residential drain lines, and other appropriate drain lines. The *MicroDrip*® system injects one dose every 15 minutes to provide a consistent microbial coating of the treated drain line to maximize microbial effectiveness. For use with the *MicroDrip*® dispenser (dispenser is 4 ¾" wide x 8 ½" high x 3 ½" deep).

Application Instructions:

To fill *MicroDrip*® dry cartridge - (DO NOT add water until ready to install: cartridge may leak). Remove adhesive tab from top of cartridge. Fill with tepid tap water. Replace adhesive tab. Gently shake cartridge to dissolve microbial formula. Turn dispenser ON/OFF switch to OFF. Place the cartridge into the dispenser. Turn dispenser ON/OFF switch to ON. As with all injection systems it is recommended that the tubing be monitored for buildup and replaced as needed. Replace cartridge monthly.

Storage:

Store at ambient temperature, do not allow to freeze. Empty cartridges should be disposed of in garbage receptacle.

Product Information:

Environmentally friendly
 Safe for plumbing lines and septic systems
 Contains no corrosive or caustic chemicals
 No free enzymes or FOG emulsifiers

Non-flammable
 Does not cause pass-through
 Multiple strains of naturally occurring bacteria

Precautions:

Do not ingest
